DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 11-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 11, the recitation "a MSBs", line 5, is indefinite.

As per claim 14, the recitation "said dither offset value", line 2, lacks a proper antecedent basis. It is also indefinite as to what the function of "said dither offset value" is in the method of claim 11. For the purpose of examination, claim 14 is presumed to include the limitations of claim 12.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11,13 and 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Priem et al (5,734,369).

Art Unit: 2124

Priem et al discloses in figure 7, a reduction of a pixeldata value including generating a respective error offset value (output from 71) and adding (72) the error offset value to the MSBs of the data value to producing a respective result value as claimed.

5. Claims 1-10 are allowed.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuong D Ngo whose telephone number is (703) 305-9764. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kakali Chaki can be reached on (703) 309-9662. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
